# Activity 3: Web Accessibility

**Here is an evaluation of the accessibility of <https://www.coolthings.com/> using the 10 tips for evaluating accessibility:**

**Perceivable:** The website includes alternative text for images, but some of the images do not have alternative text. The website's content is easy to read due to good color contrast and a clear hierarchy of headings.

**Operable:** The website is easy to navigate, with clear and consistent links and buttons. The website is also fully keyboard accessible.

**Understandable:** The website includes clear and concise language, and the content is organized in a logical and intuitive way.

**Robust:** The website is compatible with a wide range of assistive technologies, including screen readers.

## Things the website does well:

The website has good color contrast, making it easy to read the content.

The website is fully keyboard accessible, making it easy to navigate for users who rely on a keyboard or assistive technology.

The website includes alternative text for most images, making it more accessible to users who are blind or have low vision.

The website is compatible with a wide range of assistive technologies.

## Things the website could improve:

It could be helpful to include more detailed descriptions of the products featured on the website to make the content more accessible to users with cognitive disabilities.

The website could include more multimedia content, such as audio or video descriptions, to make the website more accessible to users with disabilities.
