## Home Exercise 2.1

Pick some products that are

a. Effective and efficient:

Dishwasher, its efficient because its price is low compared to its function and its effective because it doesn't waste time in cleaning dishes by your own hand.

b. Effective but not efficient:

MacBook's(apple laptops),it is not efficient because it is very expensive and it is effective because its processor is very fast and can do multiple operations in the same time.

c. Not effective but efficient:

Old Phones(like Nokia), its efficient because it is low in price, but it's not effective because it wastes a lot of time to call somebody as you will search for the contact by buttons of the phone.

d. Not effective and not efficient:

Antique cars, it's not efficient because it is very expensive even more expensive than some modern cars and its not effective because its motor is very old and lacks necessary options that we use frequently now adays.
